Igalia is a global company, headquartered in A Coruña, Galicia, Spain. Established in 2001, we have grown to over 100 developers, which today span more than 20 countries while covering a wide set of hardware platforms. We are celebrating our 20th year in 2021, and how we grow to over 100 developers in over 20 countries, and how we play important roles in the FLOSS ecosystem.

Igalia is composed of multiple teams deeply specialized in developing innovative open source technologies and solutions in various areas within the Free/Libre Open Source Software (FLOSS) community while covering a wide set of hardware platforms.

This year we are happy to celebrate and look back on our first 20 years, how we grew to over 100 developers in over 20 countries, and how we play important roles in the FLOSS ecosystem.

A Global Company
Headquartered in Spain, Igalia has become a global company with customers all over the world. Our team spans timezones, cultures, and continents.
